## BIOGRAPHY

Antony Woolmer is a British writer, director, and cinematographer working in independent film and branded content. Rooted in a background in photography and a childhood spent in the performing arts, he brings a visual instinct and a natural feel for performance to everything he makes.

His work draws heavily from personal experience — a quality that runs through both his own writing, which favours restraint, quiet tension, and images that give the audience room to breathe, and his work as a cinematographer, where he brings the same attentiveness to other directors' visions.

He began making films in 2022 and has since worked across shorts and features in a range of roles. His short film *The Weight of Silence* (2026), which he wrote, directed, and shot, is his most recent work as a filmmaker.

## PRESS

*"But visually is where the film is at its strongest. Lalor and Woolmer make a terrific technical duo who keep us struggling under that current of uneasy apprehension. The bleak palette, fabulous lighting and claustrophobic framing effortlessly create and maintain a constant restlessness."*

UK Film Review — *Wives' Tale*, September 2025
